* Washington regulations state any medication may be given not less than 24 hours before post time but warn that this time restriction does not imply any drug given near this deadline won't show up as a positive test result and lead to a violation and penalty.

+Not available means the threshold used is one recommended by RMTc. ++Phenylbutazone threshold is 2 mcg/mL for graded stakes races.

Threshold concentrations are as follows: mcg=micrograms (1 millionth of a gram); ng=nanograms (1 billionth); pg=picograms (1 trillionth)

Rules effective as of May 28, 2013
